

DELLTechnologies

Redefining the way we work

NAVIGATE THE TRANSITION TO REMOTE WORK
WITH DELL TECHNOLOGIES

We're here to help you enable your teams to do more than ever – wherever they need to do it from. Empowering your team with remote workforce technology solutions is a great way to turn challenges of access and geography into opportunity and can be done without compromising productivity, connectivity and unity.

Dell Technologies broad portfolio of digital technology solutions, products and services drives business success and ensures a flexible, secure remote experience for your team, allowing you to expand opportunities and streamline operations – anywhere, anytime.

A study in the Harvard Business Review revealed that remote employees completed nearly an extra day's worth of work every week compared to their in-office colleagues.²

Dell Technologies addresses remote workforce requirements for a wide array of users so that wherever work takes you, we'll be there to address your needs. We ensure a productive, fast and smart remote environment with enhanced security, workstations and datacenters that handle heavy workloads, and thin and lightweight designs ideal for travelling and moving about.

Latitude is the PC that knows you

One of the most important elements of working remotely is having a space that functions as your office. This could ideally be a spare room where you can close the door to ensure focus, and if this is not possible, you should dedicate a corner of your home to the purpose of work. Once you have the space with a desk and good Wi-Fi connection or fixed broadband, you'll need the right technology to make it productive.

The intelligently redesigned Latitude family with advanced user authentication is powered by Intel® Core™ i7 vPro™ processors and packed with features like Dell ExpressSign-in, ExpressCharge, and ExpressConnect that allow you to get to work faster, connect instantly and stay productive longer. The Latitude portfolio is especially ideal for workers within field sales or marketing who require an uninterrupted highly mobile capability with a lightweight design.

The impressive and powerful 2-in-1 Latitude laptops give you the flexibility to stay active while you work. Join meetings in the garden or move about your home environment – with Latitude 2-in-1, you can work how and where you want, faster than ever.

RELIABLE PERFORMANCE

Boost performance and run demanding applications with the latest 11th generation Intel® Core™ processors.

DURABLE BY DESIGN

Light and stylish, easy-to-carry, work and travel without worry with its sturdy chassis.

SECURE AND MANAGEABLE

Your data stays safe with endpoint security, advanced user authentication and data encryption software.

Latitude 15 5000 Series Model 5510

Enhanced security with Wyse and virtual desktop infrastructure

For desk-centric workers, maximizing their work with productivity-boosting technology is key. Wyse thin clients are designed to enhance your virtual workspaces with ultimate security and intelligent unified management, providing users with a more productive digital experience.

Wyse is ideal for workers in the health or finance sector or other users who do highly sensitive work – with Wyse, no data ever leaves the datacenter.

It's time for Precision

Workstation users have typically been restricted to working in an office rather than remotely due to size constraints of the machines they use. Now that equivalent levels of performance are available in the latest devices' rather than repeat remote and workstation again, even workstation users have the opportunity to work from home.

Dell Technologies thin and light Precision workstations are built for intelligent performance and mission-critical reliability, designed to empower creative users in manufacturing, engineering, media and entertainment who do highly graphical content with heavy workloads. Creating and launching big ideas is made easier than ever with a home-setup that includes a Precision workstation for a seamless and stunning work experience.

Optiplex 7000 Series Ultra Desktop

As diverse as your work

Optiplex desktop computers feature versatile, space-saving form factors and 9th generation Intel® Processors to unleash your full potential while working from home.

They are ideal for users within inside sales and operations who require the right home-setup for full speed productivity and a smarter, faster experience.

COLLABORATION MADE EASY

Interact virtually with responsive touch displays, intelligent audio and pop-up webcams to communicate without boundaries.²

FITS IN AND STANDS OUT

Enhanced design with multiple mounting options, and discrete graphics support on the 7070. They're smarter and more powerful.²

THE ULTRA DESKTOP YOU DIDN'T EXPECT

A fully modular zero footprint desktop solution* is ideal for users with limited space at home. Its interchangeable elements and ultra-compact PC module, which can be hidden inside a monitor stand, create a sleek desktop experience, optimising any home office environment.

THE BEST OF BOTH WORLDS

The beauty and aesthetics of an all-in-one with creative ability, flexibility and performance of a traditional desktop.

Precision 15 3000 Series Model 3550

A FULL REMOTE ECOSYSTEM

Stay flexible and connected with remote working solutions

As technology continues to develop, remote work is becoming more common in a multitude of industries. Fueling the remote work environment with Dell Technologies full ecosystem ensures smarter, faster experiences – and with all the right components, you're ensured to stay as productive at home as in the office.

Docking stations with USB Type-C Connections

Reconnecting immediately as soon as you connect your laptop to a powerful Dell docking station.

With a fully charged laptop, you are enabled – and encouraged – to get up, move about and take video calls on the balcony or in the garden. When you return to your home desk, you can resume full speed productivity immediately by gaining access to all your peripherals without having to plug each one into the laptop.

Dell Thunderbolt Dock TB16 and WD19TB charge your system faster and link all your electronic devices to your laptop PC using a single Thunderbolt 3 Type-C USB cable that makes it easier than ever to deliver power, data, audio and video in one convenient cable, no matter what system you use.

Dell Docking Station WD19 is our most versatile dock that boosts your PC's power and enhances your productivity. The future-ready, modular design lets you swap out modules with ease if you need to do field replacements or upgrade your systems.

ONE CABLE FOR POWER, DISPLAY AND PERIPHERALS

Connects multiple displays, transfers data fast and connects all your peripherals.

FASTER DATA TRANSFER SPEEDS

USB Type-C can transfer data at up to 10Gbps
USB Type-C with Thunderbolt 3 can transfer data at up to 40Gbps

USB POWER DELIVERY

USB Type-C cable supports up to 130W to power your laptop and peripherals

Screen real estate

Having the right display will not only provide you with a vivid and colorful computing experience, it will also greatly enhance your home productivity. In a constrained home office space, dual monitors may be impractical, but they will allow you to get more done.

Dell Technologies' award-winning monitors are designed to fit every scenario. Built with outstanding reliability, the monitors are packed with productivity features to boost efficiency, while our UltraSharp 4K monitors incorporate advanced monitor technology for ultimate performance.

Dell Technologies' Display Manager is a comprehensive management tool providing optimal front-of-screen experience, efficient display management and easy and effortless multitasking, helping you increase everyday productivity.

Your keyboard and mouse matter, too

Investing in a good external keyboard and mouse will do wonders for your remote workspace. Not only are these input devices more versatile than your laptop's built-in options, but they're also often more comfortable to use as well.

Designed with sleek lines, a compact size and chiclet keys, the Dell Wireless Keyboard and Mouse offers a contemporary and comfortable design with the convenience of wireless performance.

Choose the right webcam and headset

Working from home means a lot more video calls. Teams like to see each other when they collaborate, meaning you'll want a good webcam and headset to make for a comfortable quality experience.

Integrate the experience with the P2418HZM Dell 24 Monitor with the 2MP Full HD infra-red sensor camera and noise-cancelling mic and two 5W integrated speakers. A personalized, secure experience in stunning clarity, designed for productivity.

Stay secure and supported – anytime, anywhere

Get systems dispatched directly to your employee's home office, imaged and ready to go with ProDeploy. Workspace ONE™ ensures that all future updates happen securely and seamlessly in the background, so your employees have the latest setup without interrupting their productivity.

Keep your team productive while working remotely with ProSupport Plus. Our AI-driven support tool provides insights and recommendations to proactively respond to IT issues remotely. Our engineers are standing by 24x7 to help solve IT issues or accidental damage encountered by your remote workforce.

CONNECTIVITY

Work remotely without feeling remote

While working remotely, it is essential to have a sense of unity in order to stay motivated and productive. Regular check-ins, group brainstorming and even virtual coffee or lunch meetings with your team will help you work remotely without feeling remote.

Maximizing interaction with your team is made efficient and easy with Microsoft Teams that provides a seamless, scalable and secure experience for users – from one-on-one video calls on mobile and desktop devices to conference meetings and global live events delivered to thousands of people.

HOW DOES IT WORK?

Microsoft Teams provides a single, intelligent communications and collaboration experience for chat, calling and meetings. The online meeting experiences on the platform are immersive with a rich, high-definition audio and video experience that enable users to interact and collaborate easily, regardless of the device or network.

You can even enhance the efficiency of your meetings with Microsoft Teams' intelligent backend that provides transparent access to information and contextual insights drawn from usage patterns. Achieve more together as a team – no matter how many people or how many places you're in – without ever compromising privacy, control and security.

Once you're all set up in Microsoft Teams and have invited everyone you work with to chat, meet, call, or collaborate in one place, make sure you make the most of your time on the platform by having a clear purpose of your meeting, turn on your video, practice inclusion and ask everyone for their input. You can also share and edit notes and files in real-time in Microsoft Teams or schedule follow-up meetings to recap.

2-in-1 Touch Notebook

BEING A UNITED, REMOTE PRODUCTIVITY POWERHOUSE HAS NEVER BEEN AS EASY AS IT IS NOW WITH MICROSOFT TEAMS.

TIPS TO GET THE MOST FROM REMOTE WORKING

It's a great idea to figure out the environment that you need to work successfully.

Set yourself up for success where you can focus on the tasks at hand and be ready to tackle whatever comes your way. Consistent connectivity is integral to your success, but there's more to a successful setup than an internet connection.

1. All dressed up and nowhere to go

It's important to stick to your structured routine. Shower and get dressed, prepare a good breakfast and get into the right work mindset. Get an overview of your day's tasks and meetings and prepare for them.

3. Staying productive

Replicate your office experience as closely as you can while working from home. Structure your day exactly as you would a day in the office; commence work at the same time, have lunch and take coffee breaks, and sign off around the same time as you normally would.

Set up your workspace in a similar fashion and check your email after-hours the same way you would, or wouldn't, on office days.

Avoid TV to stay focused on the task at hand and to remain in the zone.

2. Self-care

It's a fine line between "work" and "home" so don't find yourself stuck to your computer screen for a longer period. Commit to your fitness routine and make sure that you're creating blocks in your schedule to eat healthy, nutritious meals so that you can remain focused and productive.

The benefits of remote work can stretch into your life outside of work as well. With increased flexibility, you can take time to make sure you're not missing life's important moments. As a remote worker, you have a lot more flexibility.

4. Schedule time for socializing

When you work remotely, you miss out on the built-in social benefits of an office. Connecting with people during the day is important for a sense of unity and may enhance both your mood and motivation. Create a social agenda and time during your workday to connect with colleagues and friends, either in person or in Microsoft Teams.

DELLTechnologies

Dell Technologies is an expert in remote working set up, infrastructure and support with over 10 years of experience in its own Connected Workplace Program. The work from home tips are suggestions to help employees working remotely.

*Based on Dell internal analysis of competitive products, June 2019. Ultra 7070 supports Dell and 3rd Party VESA Displays up to 27", sold separately. Zero footprint solution requires OptiPlex 7070 Ultra Fixed or Height Adjustable Stand, supporting VESA mounted displays up to 24" and 27", respectively.
